Born in Gdansk, Poland. I have been a US resident, New Jersey, since February 2021. As a Senior architect I'm registered in the Chamber of Architects of the Republic of Poland since 2002, license no. 4996/Gd/91, entitled me to design without any limitations.

I have gained invaluable experience in private housing designing, public and industrial designs, as well as restoration and conservation architecture. I have been running cross-sector projects from concept work, through blueprint to building permit and enjoyed assisting investors during the construction process. My management skills allow me to work well under pressure when task prioritising and time restraints are vital to the project success.

I am looking for new opportunities and I am interested in working in an international environment with more new challenges where I can use and expand my knowledge and experience.

Please find the list of my most important work experiences attached below.

---

Education

Gdansk University of Technology  
Architecture, Master of Engineering

1980.10–1986.06  
Gdansk, Poland

---
